Walks along the Hatiguanico River:

It is accessed by an embankment of about 8 kilometers from the point known as Hato de Jicarita (Km 104 of the National Highway). It starts from a jetty in motor boats through the vast waters of the Hatiguanico River, considered the Amazon of Cuba. Exuberant mangroves and a diverse flora and fauna of fish, waterfowl, reptiles and mammals can be appreciated during the journey of about 14 km where you can visit the source of the river and take a refreshing swim in its crystalline springs. Capacity: 60 pax in two sessions (30 in the morning and 30 in the afternoon).
