The Cave of the Fish

15 kilometers from Playa Larga is the Cueva de los Peces, the largest flooded cavity in the Cuban archipelago, an ideal site for speleo diving.

It is located 100 meters from the coast and is a natural pool or cenote, a small and deep lagoon over 70 meters deep with very clear water, which communicates with the sea through an underground tunnel.

A restaurant and facilities for the rental of underwater immersion equipment operate on site.
