Hiring the Nauta Home Service

It is the service that facilitates Internet access with ADSL technology to residential customers.

Advantages of the service:

Internet access from the comfort of home.

Lets you talk on the phone while browsing the Internet.

Possibility of hiring the navigation speed that best suits your needs.

The associated nauta account can also be used from Wi-Fi areas and navigation rooms.

It is currently marketed in specific areas within some Popular Councils and will gradually be incorporated into all the provinces of the country in areas where technical conditions are created.

To contract the service you need:

- Reside in one of the areas where the service is marketed.
 - An active telephone service.
 - A telephone pair with the technical conditions that allow establishing a link for data transmission and use of the service.

The service offer is made up of:

A qualification fee of 10.00 CUC that is paid once.

A monthly fee that depends on the contracted speed (see Rate table).

A nauta access account with domain @ nauta.com.cu that is associated with the link and includes 30 hours of browsing per month. If this time expires you can recharge the account by prepaying what you want to consume.

A modem with accessories (installation kit) that you must pay when you hire the service, which will be delivered with a Quick Installation Guide.

Speeds (Kbps) Rates: CUC / 30 hours

1024/256 * 15.00 CUC

2048/256 30.00 CUC

3072/512 50.00 CUC

4096/512 70.00 CUC

The monthly fee of the first month of contracting for the speed of 1024/256 Kbps will be FREE. Those customers who hire higher speeds will be rewarded with the same amount - \$ 15.00 CUC - and will only have to pay the difference depending on the speed selected.
