Visit to the Cuban Crocodile Reproduction Station.

It is located 20 km from the National Highway to the right of the road from Jagüey Grande to Playa Larga, its main objective is the reproduction in captivity of the Cuban Crocodile, an endemic species threatened with extinction, it has an adequate facility with corrals where The specimens from 1 to 6 years old and adult reproducers are shown, the tour begins with an explanation of the objectives of the installation, life cycle, reproduction, feeding and importance of the Cuban Crocodile in nature as an umbrella species within the Zapata ecosystem. A show of capturing the crocodile can be observed and photographed with these saurians. The place also has souvenir shops and a ranch enlivened by a musical group from the territory that plays Cuban music where you can enjoy a wide range of Cuban and international cocktails as well as taste the crocodile meat. The visit lasts approximately 45 min.
