Principles for the operation of the piqueras in the Ciénaga de Zapata municipality:

The main objective of establishing these principles is to order the activity of passenger transportation in the Ciénaga de Zapata municipality.

Principles: The boobies

They are approved by the council of the municipal administration of Ciénaga de Zapata.

They will be authorized to operate the vehicles approved for each one.

They will have a limited capacity of vehicles to park.

They will have road signs in accordance with the provisions of current legislation.

The proper functioning, organization and discipline of the same will be supervised by the bodies empowered to do so.

On the right and use of the boobies

The responsibility of the organization and discipline in the piqueras will be the carriers

About carriers

They will comply with the provisions of the laws, regulations and resolutions that govern the activity

They will define their trips based on the user's destination

They will provide the services according to the order of arrival at the piquera and at the customer's option, always prioritizing the customer's option.

On the authorizations and regulations for the transportation of cargo and passengers of private public service:

1-The Municipal and Provincial extension is authorized to all types of automotive means that request it, without having to mediate a certificate from the municipal transport bodies of the People's Power.

2-The National extension is authorized to all types of automotive means (either to transport cargo as passage) that request it, due to the need of the Municipality, since we are in a remote place and difficult to access, so most of people have to travel to other provinces to solve different procedures that can be as variable as: medical shifts in hospitals such as Cienfuegos, Havana and Villa Clara, to name just a few, also to process legal matters, as well as go to recreational centers, Historical places and museums of the

Revolution, all at the request of the service by Cuban clients residing in Cuba, on the other hand, it is necessary to bring and bring necessary loads for the municipality, in this process the certificate of the obligatory consultation of the multidisciplinary group accrediting it.

3-The double service is authorized, that is, loading and passage, for cycles (bike taxis), because in our municipality this service is needed, as it is atypical, to transport TVs and household appliances to repair shops, gas balls, bathroom set of the materials warehouse, oxygen bottle for a patient, also on the other hand we are in a beach area where almost all customers travel carrying suitcases, boxes and bags with their belongings, in this process no You have to mediate the certificate of the multidisciplinary group accrediting it.

4-On the Activity of Auxiliary Services and Connected to transport, which passed from the MTSS to the UET of the Ministry of Transport, all those that were in force at the time of the change and new requests are approved to be updated in their new governing body they have to be approved by a certificate from the multidisciplinary group.
